## **Works of Art For Marine Mammals**

**Art project**

**for supporting whale research**

Stones, shells, snail, shell, driftwood come from the beaches of the fjords. They are collected with care, processed with love.  
What is your favorite piece?

With the purchase of one of my small works of art you support <https://www.oceansounds.no/orca-acoustics>

Would you like to make yourself or others happy with one of my objects and at the same time make a contribution to whale and marine research?

Or would you like an individual production from me? Do you need something special as a present for a birth, wedding, or any other occasion?

Just write me an email: [info@hermastein.de](mailto:info@hermastein.de)

100% of the proceeds from my smaller objects go to Ocean-Sounds as a donation, from the larger objects 50%.

Have fun with choosing and giving away!

## Help Give a Voice to the World's Whales and Dolphins

Whales and dolphins are not only the most socially complex, but also the most closely bonded societies in our oceans. Their languages, culture and identity are shaped by ocean sounds. We want to involve more people get to hear them, to understand the similarities and needs we share with them, and create the motivation to Act and Protect the oceans on which we all depend.

Founder Heike Vester has a lifelong love of the ocean and an ever-increasing urge to understand, preserve and protect its largest inhabitants.

“Sound is everything for these animals and if you want to dive into their world you also have to dive into their sounds”.

Purchases you make here go towards supporting Ocean Sounds' ongoing work.
